PROFESSIONAL SUMMARY

Software Development Engineer with **2+ years of experience** building production web, mobile, and cloud applications. Strong in **React, React Native, Next.js, Node.js, GraphQL, and AWS**, with experience designing backend systems, integrating third-party services, and owning features through deployment.

EDUCATION

B.Tech in Computer Science Engineering, Gauhati University 2020 – 2024
CGPA: 8.2

TECHNICAL SKILLS

Languages	JavaScript, TypeScript, Python
Frontend	React, Next.js, React Native, Tailwind CSS
Backend	Node.js, GraphQL, REST APIs, AWS Lambda
AWS	Amplify, AppSync, DynamoDB, SQS, Greengrass, Docker
Integrations	Google Maps APIs, Juspay, Firebase, OTP, Payment Gateways
Tools	Git, GitHub, MongoDB

EXPERIENCE

Software Development Engineer I (SDE-1), KifferAI — Remote Aug 2024 – Present

- Developed production **web and mobile applications** for rider, driver, business, and administrative workflows using React, React Native, Next.js, and TypeScript.
- Architected serverless backend services using **AWS Amplify, AppSync, GraphQL, Lambda, and DynamoDB** for real-time application workflows.
- Built core mobility workflows including **booking, driver allocation, trip lifecycle, fare calculation, GPS tracking, fleet management, and payments**.
- Integrated **Google Maps, Juspay, OTP authentication, Firebase, and notification services** across production applications.
- Developed admin and operational dashboards for **booking management, driver operations, payments, reporting, and fleet visibility**.
- Built event-driven data pipelines using **AWS Greengrass, Docker, and SQS** for real-time medical device data ingestion.
- Owned features end-to-end across **architecture, development, testing, deployment, and production debugging** across iOS, Android, and Web.

Frontend Developer Intern, UjuCode — Guwahati, India Jun 2023 – Sep 2023

- Developed responsive React interfaces and integrated APIs for live badminton scoring and tournament management applications.

PROJECT

Medical Edge Data Processing Platform

- Developed an edge-to-cloud data ingestion platform using **AWS Greengrass, Docker, and SQS** for medical device data.
- Implemented reliable synchronization and offline-first processing for intermittent network connectivity at edge locations.
